

A feedback loop will be built to allow users to rate and provide comments on the generated outfits in order to continuously improve the model. This information will be utilized to improve the model's performance over time, assuring customer happiness and industry relevance

Milestones:

Here is a breakdown of the expected milestones for this project.

Initial Meeting: ASAP

Research, Problem Identification & Data collection: 3-Days

Building AI -model: 3-Days

Implementation: 2-Days

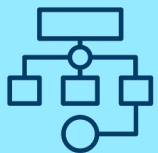

Evaluation of Model: 2-Days

Note: It may vary, due to some critical circumstances

Data Collection:

The data will be collected from different Platforms, such as Keggall <https://www.kaggle.com/datasets/sunnykusawa/tshirts> and others.

Work Flow;

GAN Model Workflow
